

## USASPENDING.GOV

USASpending.gov provides data on federal contracts, payments and associated organizations. Within AnalyzeThe.US, every payment is connected to a commercial organization's business unit and a government product contract, which is a component of a general contract. For clarity, component/subordinate commercial organizations are connected to their parent commercial organizations (note: parent commercial organizations are provided by USASpending.gov). The government offices and departments that issue contracts are associated with one another and connected to their respective contracts.
